HUYEN NGUYEN

Seattle, WA • (508) 762-8832 • huyenbnguyen.cs@gmail.com • linkedin.com/in/huyenbnguyen

PROFESSIONAL SUMMARY

Senior Backend Engineer with 6.5 years of experience architecting and developing distributed systems, API integrations, and enterprise platforms. Proven track record of shipping infrastructure automation and developer productivity tooling. Strengths in navigating ambiguous problems in unfamiliar domains, designing scalable systems, and partnering with PM and engineering peers to deliver business-critical objectives. U.S. permanent resident.

TECHNICAL EXPERTISE

Languages: Python, Java, Bash, SQL

Cloud & Infrastructure: AWS (EC2, Lambda, API Gateway, SQS, S3, DynamoDB, RDS/PostgreSQL, CloudWatch, ElastiCache), Terraform (IaC), Docker, Kubernetes, Azure

Frameworks: gRPC/Protobuf, RxJava, Dagger, Hibernate, ASP.NET Core

Data & Orchestration: Snowflake, PostgreSQL, Apache Airflow, Amazon S3, Tableau

DevOps & Tooling: CI/CD (GitLab Pipelines), Artifactory, LaunchDarkly, FlexNet Code Insight, Swagger/OpenAPI

Tools & AI Productivity: Git, Claude Code, Cursor

System Design & Core Skills: Algorithms, Data Structures, Distributed Systems, Scalability

WORK EXPERIENCE

Career Break - Seattle, WA — May 2025 – Present

- Planned family time following U.S. permanent residency (Apr 2025 – Oct 2025)
- Active job search and technical upskilling (Nov 2025 – Present): Completed online coursework on **applied generative AI**. Studied **data structures & algorithms**, **system design**, and **distributed systems** to deepen senior-level fundamentals.

Salesforce / Tableau - Seattle, WA — Nov 2019 – Apr 2025

Senior Member of Technical Staff - Promoted April 2022 — Apr 2022 - Apr 2025

- Designed and shipped release automation using AWS, Airflow, and Snowflake that cut Tableau Cloud's weekly release cycle from 4 days to a few hours — a **~85% reduction** in release lead time — by programmatically aggregating build changes, test results, and stakeholder sign-offs.
- **Core developer** on Auto Drumbeat, an internal campaign-management platform built with 3 other engineers and PMs; enabled PMs to launch and track outreach campaigns and let recipients take actions directly from Slack. **Drove project direction, task breakdown, and sprint-level estimation.**
- Designed data models and built Tableau dashboards used by **5,000+ Salesforce employees** to monitor Engineering operations, establishing a single source of truth for cross-team reporting.
- Successfully mentored a software engineering intern to a **full-time return offer**.

Member of Technical Staff — Nov 2019 - Mar 2022

- Designed the database schema and delivered a proof-of-concept for Registry — **Tableau's first internal system for tracking third-party library ownership** — on Amazon RDS (PostgreSQL), integrating scan output from FlexNet Code Insight with repo CODEOWNERS data.
- Built a Terraform-managed service on EC2 to continuously collect feature-flag data across the Tableau Desktop codebase and LaunchDarkly, **eliminating a manual release-gate check** and improving release-readiness signal quality for **hundreds of engineers**.

Hitachi Vantara - Waltham, MA — Jun 2018 – Oct 2019

Software Engineer

- Backend engineer on Hitachi Content Platform for Cloud Scale (HCPCS), an **Amazon S3-compatible object storage platform serving enterprise workloads**.
- **Owned the Management API microservice** — the authentication, authorization, and abstraction layer fronting all internal APIs.
- **Improved API response time by 80%** by redesigning hot read paths to query an in-memory cache layer instead of the backing database on every request, reducing database load and improving p99 latency.
- Designed and shipped a scheduled auto-cleanup mechanism for database storage, reclaiming significant disk capacity during failure-recovery scenarios and **preventing storage-exhaustion incidents**.

Microsoft - Boston, MA Oct - Dec 2017

Software Engineering Intern

- Built Fact or Fiction, a full-stack web application that classifies sentences as subjective or objective, deployed on Azure.
- Implemented backend in C# / ASP.NET Core MVC with Entity Framework; designed the relational schema for users, queries, and sentence entities.
- Developed REST APIs for text submission, user registration, and sentence voting.

EDUCATION

Worcester Polytechnic Institute (WPI) - Worcester, MA Aug 2014 – May 2018

Bachelor of Science in Computer Science • GPA: 3.87 / 4.00
